Endsight MSSP requires:
Endsight Endpoint and Cloud Protection
Endsight DNS Protection
Endsight Phish Testing and Security Awareness Training
These products are billed seperately from the MSSP Agreement.

¹Security Operations Center
²Security Information and Event Management
³Security Orchestration Automation and Response
⁴Initial event discussion and isolation is covered under all MSSP agreements, as well as the report of the actions taken to isolate the spread. Remediation and a full report of attacker activities are outside the scope of MSSP agreements.
⁵For products covered under this agreement, Endsight will make global configuration changes and provide support on product portals to ensure ongoing functionality and performance. This does not cover Move/Add/Change requests, or individual computer troubleshooting.
⁶MSSP Standard includes one Non-Computer supported device for log retention. MSSP Full includes two. Additional sources may be purchased.
† Products that are exclusive to the MSSP program.
