endsight

1 **Document** any error messages that you are receiving.

2 **Check cables** to be sure all cables from your computer to the wall or other devices are firmly plugged in.

3 **Restart your computer** to see if the error returns.

4 **Still having problems?** Contact our Response Center for technical support.

For the best computer experience:

At the end of the day, **Sign out** rather than locking or powering down your computer. This will close out all applications and still allow for critical overnight patching and updates.
